A clear direction.

Oprino brand guidelines

The complete visual system: logos, colors, typography, practical rules and ready-to-use applications.

Clarity. Confidence. Progress.

The visual direction for Oprino, built around the approved location-pin and forward-check symbol.

Clarity

A clear focal point, generous space and practical language.

Confidence

A stable navy wordmark and restrained, consistent layouts.

Progress

Blue gives direction. The green check suggests a completed step.

INSIDE THIS GUIDE

03-07 Logo system and usage

08-09 Color and contrast

10-12 Type, graphics and voice

13-15 Applications and protection

16-17 Handoff and Canva setup

This is a visual identity system. Industry, mission, audience, legal company name and contact details have not been supplied. Application copy is illustrative and is not an adopted tagline.

The same mark. Clean at every size.

Use the clean vector master derived from the supplied pin/check. Keep the icon proportions and wordmark together.

The symbol

Your supplied blue-green pin/check silhouette, faithfully traced into scalable paths.

The wordmark

Unbounded Medium 500 with tighter optical spacing; supplied as outlines.

The export

Fully vector SVG/PDF artwork, with smooth icon paths and an outlined wordmark.

Choose the right format.

The horizontal lockup is the default. Use the stacked version when width is limited, and the icon for compact spaces.

Primary / horizontal

Headers, proposals, email and general branding.

Secondary / stacked

Centered covers and narrow placements.

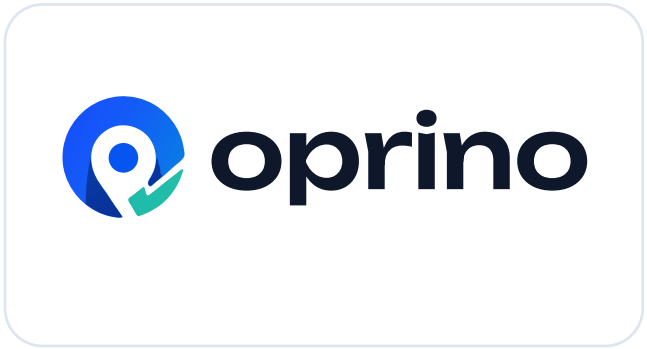

Symbol / icon only

App icons, avatars and favicons.

Wordmark-only files are supporting assets. Use them where the icon already appears nearby or where a compact word label is needed.

A version for every surface.

Choose a supplied variant instead of recoloring individual parts of the logo.

Full color / light surfaces

Full color / navy surfaces

Black / one-color production

White / dark one-color use

Flat navy / restrained layouts

Flat cobalt / single-brand color

Full color keeps the original white pin on a circular white base. One-color variants use transparent negative space.

Give the logo room to breathe.

Let x equal one quarter of the icon height. Keep at least x clear on every side of the complete lockup.

Clear space is required

Keep text, crop edges, photos and other logos outside the dashed area.

Padding is included

The supplied master exports already include the minimum outer padding.

Readable at the size you use.

These starting sizes include the supplied export padding. Inspect the final output at its actual viewing size.

Format	Digital width	Print width	Use
Horizontal	160 px or larger	30 mm or larger	Default logo for most communications
Stacked	96 px or larger	22 mm or larger	Centered, compact compositions
Icon	24 px or larger	6 mm or larger	Compact identity marker
Wordmark only	120 px or larger	24 mm or larger	Support when the icon is nearby

ACTUAL DIGITAL-SIZE EXAMPLES

Favicon exports include 16, 32, 48 and 64 px versions. This is a browser-only small-size exception; use the larger icon elsewhere.

Blue gives direction. Green signals progress.

Navy and neutral surfaces lead. Cobalt is the primary action color; mint is a supporting accent.

NAVY #0F172A

RGB 15, 23, 42

CMYK* 64, 45, 0, 84

COBALT #164CFF

RGB 22, 76, 255

CMYK* 91, 70, 0, 0

OCEAN #087DE5

RGB 8, 125, 229

CMYK* 97, 45, 0, 10

MINT #20BAAA

RGB 32, 186, 170

CMYK* 83, 0, 9, 27

SLATE #475569

RGB 71, 85, 105

CMYK* 32, 19, 0, 59

PAPER #F8FAFC

RGB 248, 250, 252

CMYK* 2, 1, 0, 1

White: #FFFFFF / RGB 255, 255, 255. Logo depth: #1235A4. Logo blue gradient: #164CFF to #087DE5. Mint gradient: #20BAAA to #10AFA0.

*CMYK values are approximate conversions. Use a printer color proof for final production.

Color that stays readable.

Use measured text pairs for communication and UI. Mint works as a highlight, with navy text on top.

Readable example

17.85:1

Navy on white

Normal text: meets 4.5:1

Readable example

5.98:1

Cobalt on white

Normal text: meets 4.5:1

Readable example

5.98:1

White on cobalt

Normal text: meets 4.5:1

Readable example

7.58:1

Slate on white

Normal text: meets 4.5:1

Readable example

7.37:1

Navy on mint

Normal text: meets 4.5:1

Readable example

2.42:1

Mint on white

Normal text: do not use

WCAG 2.2 normal text uses a 4.5:1 minimum; large text uses 3:1. Ratios above are calculated from the listed solid HEX fills. Logos have a separate exception, but interface text still needs its own check.

A distinctive wordmark. A readable system.

Unbounded for the logo. Space Grotesk for headings. Manrope for body, labels and everyday interfaces.

UNBOUNDED

oprino

Logo only / Medium 500

Tighter optical spacing: -0.012 em.

Use the supplied outlined artwork.

SPACE GROTESK

Aa Bb Cc

Headings / SemiBold 600

Sentence case and clear hierarchy.

Use for short headlines and titles.

MANROPE

Clear, useful.

Body / 400; controls / 600

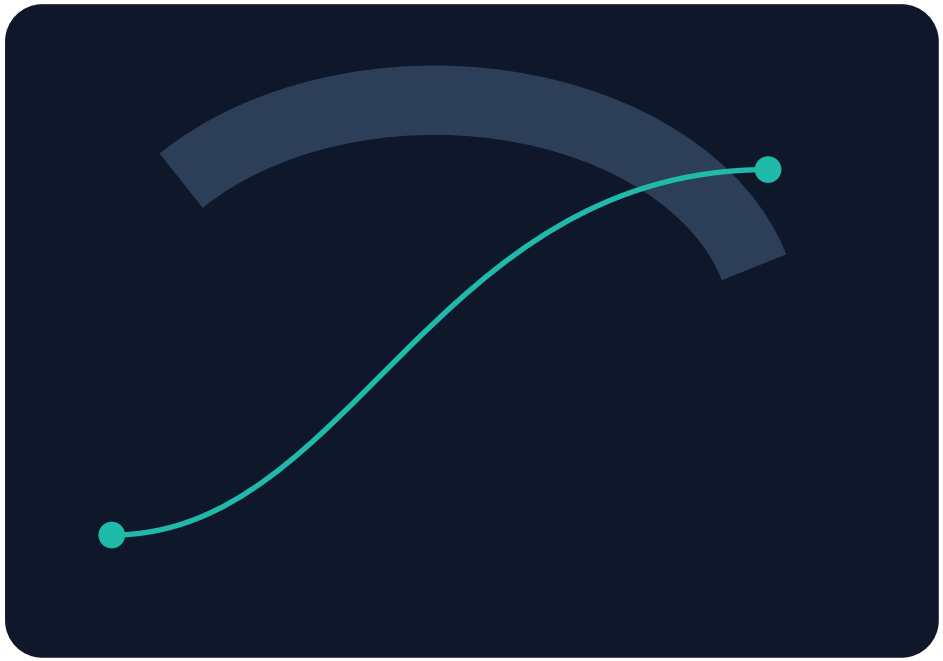

Readable text and useful labels.

Use a 1.5-1.6 body line height.

Display / H1	H2	H3	Body	Small
48 px / 3 rem	36 px / 2.25 rem	26 px / 1.625 rem	16 px / 1 rem	14 px / .875 rem
Space Grotesk 600	Space Grotesk 600	Space Grotesk 600	Manrope 400	Manrope 400

Simple geometry. Intentional space.

Use circular arcs, gentle route lines and clean cards. Keep the logo symbol distinctive and uncluttered.

Arcs and route accents

Use low-contrast decorative geometry away from text and controls.

LAYOUT TOKENS

Token	Default
Spacing	8 / 16 / 24 / 32 / 48 / 64 px
Corners	8 / 16 / 24 px
UI icons	2 px stroke / rounded ends
Surface	White or #F8FAFC
Border	#DDE5EF / 1 px

Use an 8 px base grid. A 4 px adjustment is available for optical alignment. Keep one primary action per small composition.

Say it clearly. Make it useful.

A practical writing direction for Oprino communications; adapt product details when the business brief is available.

Principle	Use	Avoid
Clear	Your update is ready.	Your data has been synergistically activated.
Confident	See the next step.	Probably the best solution ever.
Useful	Choose a location to continue.	An error occurred.
Respectful	Check the details and try again.	You entered the wrong information.
Concise	Start your next step.	Unlock a limitless new digital ecosystem.

Naming: use Oprino in written sentences and titles; retain oprino in the logo artwork. Sample campaign lines in this kit are placeholders, not approved brand taglines.

A recognizable digital presence.

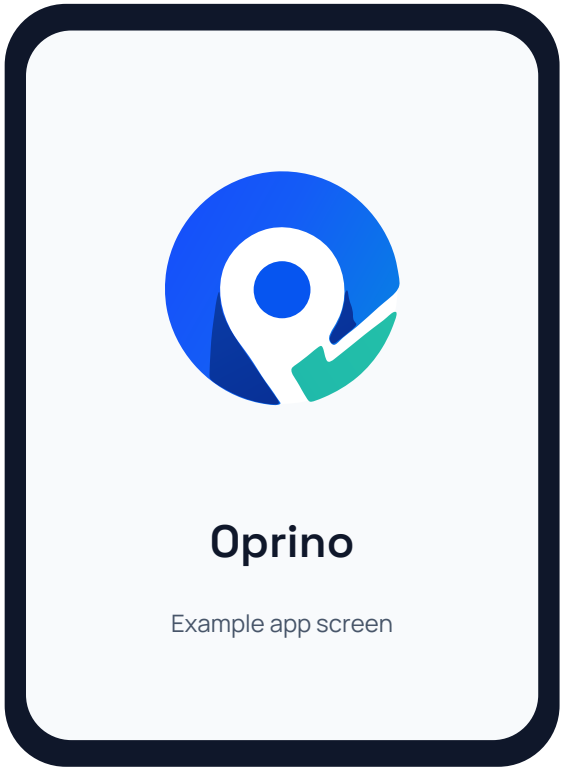

Use the same symbol for app and social identity. Keep the full lockup for headers and larger placements.

oprino

Your next step, clearly.

A product or service message belongs here.

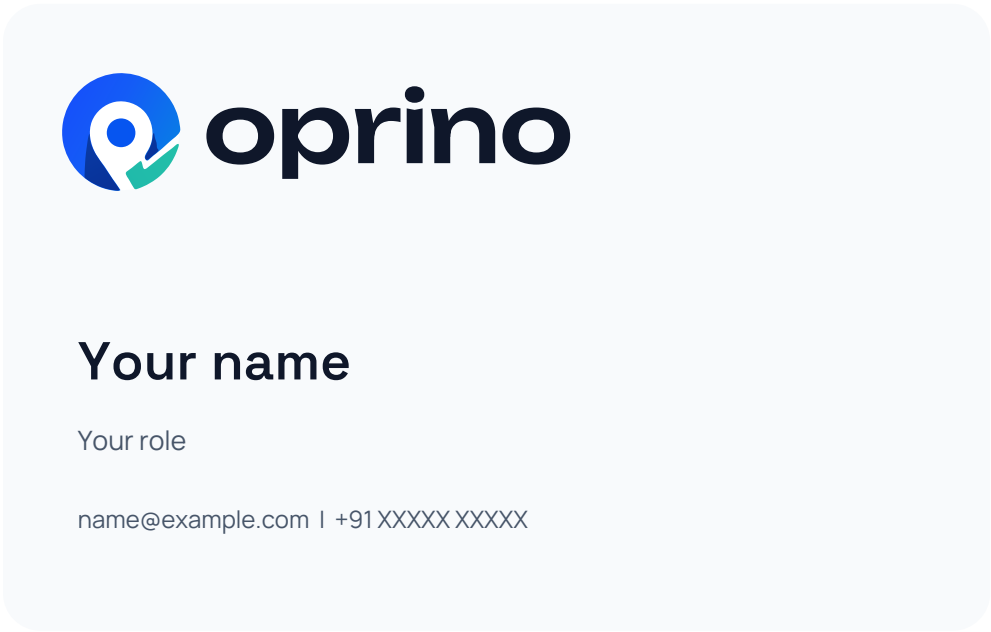

Primary action

Included: light and dark app icons, social avatar, square social post, cover banner, web hero and browser favicon set.

Professional, with room for the message.

Editable layouts are included for a business card, letterhead and email signature.

Card trim: 90 x 55 mm.

Bleed: 3 mm on all sides.

Letterhead: A4 portrait, 210 x 297 mm.

Replace all placeholders before production. Stationery PDFs are RGB layouts with trim/bleed geometry; proof final color with the printer.

Protect the shape, spacing and color.

Always start with a supplied master. Export a suitable size rather than rebuilding the logo by eye.

Do not stretch

Keep the original aspect ratio when resizing.

Do not rotate

Keep the lockup upright and horizontally aligned.

Do not recolor parts

Choose the full-color or supplied one-color variants.

Do not add effects

Avoid extra shadows, outlines, glow or bevel effects.

Do not crowd the logo

Keep the minimum x clear space free of other content.

Do not use busy surfaces

Place a quiet light or dark panel behind the logo.

Use the file made for the job.

The package is organized so designers, developers and printers can find the right asset quickly.

Folder	Format	What it contains
01-Logos	SVG / PNG / PDF	16 vector variants + 4096 px PNG masters
02-Digital	SVG / PNG / ICO	1024 px + 4K app/avatar, favicons, web manifest
03-Templates	SVG / PNG / PDF / HTML	Social post, cover, web hero, business card, A4 letterhead, email signature
04-Guidelines	PDF / SVG / PNG / MD	This guideline, brand board and editable written rules
05-Design-Tokens	JSON / CSS / GPL	Color, type and spacing tokens; responsive clamp typography
06-Fonts	TTF / TXT	Unbounded, Space Grotesk and Manrope with OFL licenses

SVG/PDF: resolution-independent vector artwork. PNG: 4096 px logo masters with clean transparency. Templates: retina exports. Use SVG/PDF for large placements and print; export PNG at the size you need.

A practical Canva setup.

The package and imported designs provide a usable handoff for Canva. Brand Hub configuration can use the same supplied values.

01 Upload logos

Use 01-Logos/PNG for 4K placements and 01-Logos/SVG or PDF for sharp scalable artwork.

02 Set colors

Navy #0F172A, cobalt #164CFF, ocean #087DE5, mint #20BAAA, slate #475569, paper #F8FAFC and white.

03 Set typography

Logo: Unbounded Medium 500. Heading: Space Grotesk 600. Body: Manrope Regular 400.

04 Start from templates

Use supplied social and stationery templates. Replace all placeholder copy and contact details.
